

Archive

noun

1. A repository for stored memories or information: the archive of the mind.

synonyms: records, annals, chronicles, accounts;

verb

1. place or store (something) in an archive.

synonyms: file, log, catalog, document, record, register;

1st Sketch

For the first archive Idea I was thinking of making a Bicycle photograph collection organized by the subjects riding them starting from young to old and female to male.

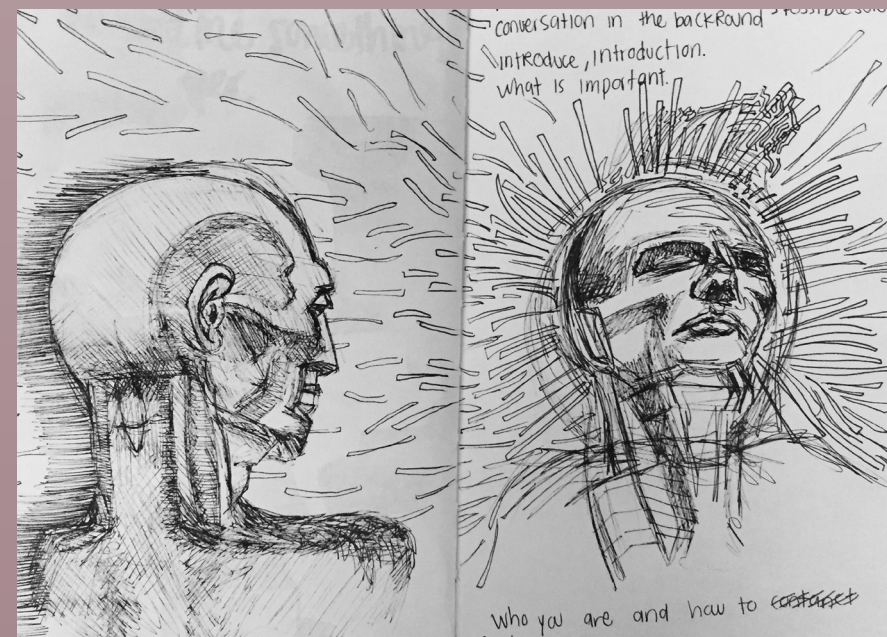

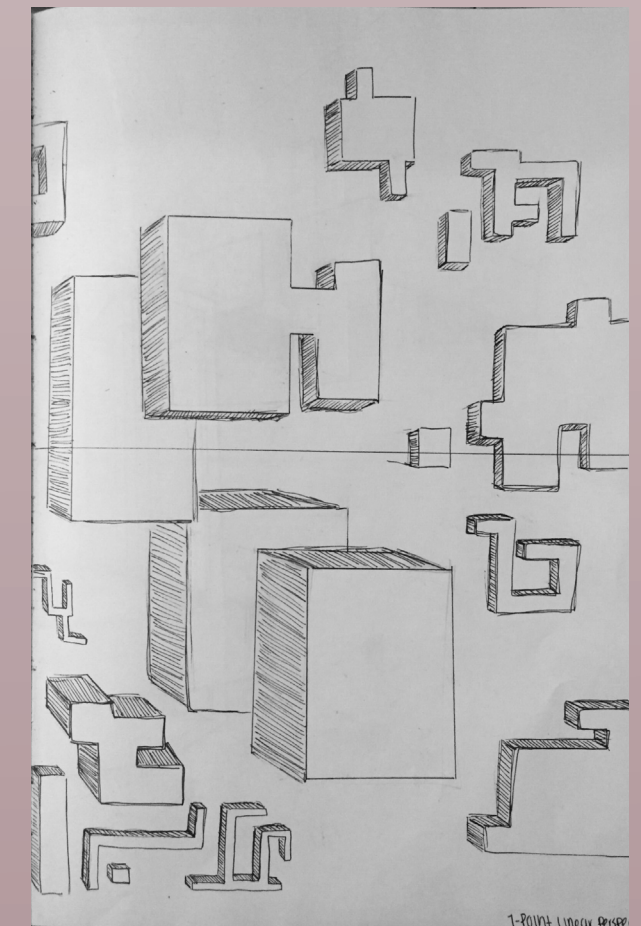

Another way of organizing the photographs would be to use the background color or hue of the bicycles to get them from dark to light or vice-versa.

2nd Sketch

For the second archive Idea I was thinking of doing a digital copy of my sketchbooks and drawings.

I have kept a sketch journal for 2 years and I have a sketchbook for almost every class I have taken at parsons. I believe it would be interesting how the images adapt to the web and how the user could interact with them.

3rd Sketch

For the third archive Idea I was thinking of gathering pieces of artwork that I enjoy.

Doing an all-kinds of art archive could help as a place to find inspiration and to spend the time wisely.
